

Trail to First Class Instructor Guide

Rules of Safe Hiking

Requirements

Tenderfoot: 5. Explain the rules of safe hiking, both on the high way and cross-country, during the day and at night. Explain what to do if you are lost.
(pg. 279, 282-283)

Rules of Safe Hiking

1. Always hike with a buddy – This way you help each other out and have more fun.
2. If hiking along a roadway, stay in a single file line and hike on the left side of the roadway, facing traffic.
3. During daylight, wear light color clothes.
4. At night, wear light colored, reflective clothing and use a flashlight; this will make you more visible to drivers.
5. **DO NOT HITCHHIKE.** This is dangerous and illegal.
6. **Stay on trails,** makes hiking easier and harder to get lost.
7. Watch your step if you do hike cross-country where no trails are available, watch your step, this will help prevent sprained ankles and “Leave no trace”.
8. Do not wear new hiking boots on long trips. They should be broken in on short hikes.
9. Use bridges when crossing rivers and streams. If a bridge in not an option, cross only shallow, slow moving water. Always unhook the waist belt on your backpack, so if you fall in the water, the backpack will not be an anchor.
10. If an area looks dangerous, do not go there. Go around it or go back the way you came.
11. Note land marks along the way for reference. In addition, occasionally look back over your shoulder to see how the trail will look on the way back.

What to do when LOST

If you do get lost, remember one thing;
4 steps that spell **STOPS** –

Stay calm. Relax, sit down, and take a sip of water, Breath Slowly.

Think. Get out your map and see what you can learn.

Observe. Look for landmarks, look for footprints.

Plan. If you know the route, go carefully and mark your trail along the way.
If all else fails,

STAY IN ONE PLACE. People will start looking for you once they realize you are gone. Blow your whistle three times. If a searcher hears it, they will respond with two blows. Keep blowing; this will help searchers find you.

How to Stay FOUND

- Make a plan and communicate it
- Mark your route on a map
- Study the map, trails and landmarks
- Pay attention on the trails
- Use a compass
- Stay on trails
- Stay out of dangerous areas
- Note landmarks along the way

Remember

Practice **“Leave No Trace”** Principles when hiking

EDGE Method of Teaching

Explain how it is done

Demonstrate the steps

Guide the learners as they practice

Enable learners to succeed on their own

Rules of Safe Hiking (Instructor Outline)

Requirements

Tenderfoot: 5. Explain the rules of safe hiking, both on the high way and cross-country, during the day and at night. Explain what to do if you are lost.
(pg. 279, 282-283)
